

My Student Did Not Pass COVID-19 Screening

Please see covid-19.ontario.ca/self-assessment for details on symptoms and screening.

Does your student have a chronic medical condition?

Yes

No

Are your student's symptoms worse/different than normal?

No

Yes

Students with stable symptoms of a known chronic medical condition may attend school. If there are concerns, consult your Health Care Provider and follow their guidance.

Call the school and inform them of your student's illness and absence.

Your student must not attend school AND

- **Should be tested for COVID-19** and isolate until a negative test result is received and symptom free for 24 hours or 48 hours if symptoms include vomiting or diarrhea.
- If you have questions, your health care provider, with knowledge of your child's medical and underlying conditions, can help determine if your symptomatic child needs to be tested for COVID-19.
- **If not tested for COVID-19** your student must remain home in isolation for a minimum of 14 days from the onset of symptoms.

Please note:

- If a disagreement between the school and a parent/guardian exists, it is recommended that the most cautious approach be taken to protect the health and safety of all those who attend the school.
- HPEPH is unable to provide clinical assessment or determine the suitability of a child returning to school.
- **If the ill student is waiting for test results**, household members (family and roommates who live with the ill person) should monitor for symptoms and be tested if symptoms develop. They are not required to isolate at this time.

How do I get my child tested for COVID-19?

Visit hpePublicHealth.ca/getting-tested-for-covid-19/ for information on locations and hours of operation for assessment centres in Hastings and Prince Edward Counties.

How do I access my child's COVID-19 test results?

Test results are available online at covid-19.ontario.ca.

How do I isolate my child?

Stay home

Wash hands frequently

Avoid contact with others

Cover coughs and sneezes

Keep your distance

Wear a face covering, if possible

For detailed isolation instructions, please visit hpePublicHealth.ca.
