

## Follow up: Marguerite Bourgeoys

### Contact of a Positive COVID-19 Case in your Student's Cohort – no risk

March 15, 2021

**A Contact of a Positive Case of COVID-19 was identified in in Ms. MacLeod/Ms. Valente's Kindergarten Classroom and testing has confirmed there is no further risk to this cohort.**

Dear Families,

This letter is a follow up to the contact you were notified about on March 13, 2021. The purpose of this letter is to inform you that testing has confirmed your student's cohort is **not at risk** because of this exposure.

**Your student is no longer required to self-isolate. They may return to school on Tuesday, March 16, 2021.**

#### What should you do?

- Continue to monitor for symptoms of COVID-19 and screen your student daily as most cases of COVID-19 are acquired in the home setting.
- If anyone in your household has or develops symptoms of COVID-19, they must self-isolate and should book an appointment at an assessment centre for testing as soon as possible. It is required that all household members isolate until the person with symptoms receives a negative COVID-19 test result or an alternative diagnosis from a health care professional.

Sincerely,

**KFL&A Public Health**
