

May is Speech and Hearing Month

Ontario's Registered Speech-Language Pathologists and Audiologists are helping those with Speech, Hearing, Swallowing and Balance issues live better lives. Here are just a few examples of the people they help:

Joseph

His parents took him to an audiologist who identified infant hearing loss at an early stage so that his language skills could progress through infancy!

Maya

Her Speech-Language Pathologist helped her to overcome her stuttering and gain the confidence to make new friends.

Joel

is on the Autism Spectrum and he sees a Speech-Language Pathologist to help with Social Communication.

Maria

Had ringing in her ears caused by tinnitus. With treatment from her Audiologist she can watch movies with her daughter and not suffer with noise interference.

Evelyn

Her Audiologist helped her find the right fit for her hearing aid and now she can hear her grandchildren say "I Love You."

Abe

suffered a stroke and was left with swallowing difficulties. His Speech-Language Pathologist helped him to retrain his muscles and now he can eat dinner with his family again.
